### **DETAILED ACTION**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yokota.

The patent to Yokota discloses in Figure 7a a display screen for a map that has different Font sizes and Font styles for road map data depending on position, category and class of data displayed as described in column 4, line 5-column 5, line 60. The Font selection is disclosed in column 5, lines 15-20. The road tables 150 associate locations, names, size of roads and class of roads with various font sizes and styles, as disclosed in column 5, lines 33-52. The patent to Yokota lacks that the highlighted item is in bold face. It is old and well known to accent words by putting them in bold type. The examiner takes official notice to this fact and considers it obvious to one having ordinary skill in the art at the time the invention was made to provide a bold faced highlighted font in order to accent the selection.

Claims 6-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
